**NOTE: in the weeks where the "capacity effective for" period straddles two calendar months (bolded dates in the table)...**

<sup>1</sup> ...for capability, the *higher* capability of the two monthly capability levels will be applied to maximise the capacity released.

<sup>2</sup> ...for capacity, in line with the weekly auction rules the highest capacity sold level from either of the two months that overlap the weekly auction will be deducted from the calculated capability level to generate the capacity to be released. Depending upon the day ahead capability any remaining unsold would then be released at the day ahead auction.

**Information provision timescales**

On a weekly basis, this table will be uploaded with new information as follows:

- Capability will be reassessed and published 3-4 working days in advance of the WSEC auction date
- Capacity for release will be calculated and published 1-3 working days in advance of the WSEC auction date

\*Please note: The long-term capacity sold at Milford Haven through October already exceeds the revised level of Unsold Obligated Firm Entry Capacity to be made available, following the ECR consultation
