## Notice to modify the Statement of Gas Transmission Connection Charges – Effective 28<sup>th</sup> January 2019.

National Grid amended the Statement of Gas Transmission Connection Charges with effect from 30<sup>th</sup> October 2018 following a review of PARCA and Connection Application fees by Project CLoCC. The implementation of Project CLoCC and further customer feedback has provided an opportunity to further review our Connection Application Fees to improve the options available to our customers.

This review has resulted in our ability to reduce Connection Application Fees and add additional transparency to our Statement to aid customers when considering applying for an NTS connection.

The attached Notice of Implementation is to implement the attached revised Statement of Gas Transmission Connection Charges (revision 9) with effect from 28<sup>th</sup> January 2019 to make the following changes;

Amendments to:

1. Reduce application fees for Simple and Medium Full Connection Offers.
2. Apply Simple (Greenfield) application fees to Entry to allow a lower fee option.
3. Quantify specific charges for pre-connection study categories to allow transparency of these indicative fees which have a pre- defined scope.

As the above changes require no changes to UNC, are not introducing any new categories to the Statement, and are reducing charges, we have issued a notice to effect these changes for the benefit of our customers as soon as possible.

If we receive any objection to this notice during the notice period, we will consider if it is necessary to conduct any further consultation.

Should you wish to discuss this notice or have any comment please contact Nicola Lond at [Nicola.j.lond@nationalgrid.com](mailto:Nicola.j.lond@nationalgrid.com) (01926 653493).

Yours sincerely

A handwritten signature in grey ink, appearing to read 'Nicola', with a long horizontal flourish extending to the right.
