Question from Data Portal Webinar	Response	
The text on the slides is so small that it is barely legible. Why cram so much text on one slide?	Sorry if you had problems reading the slide. We have ammended in the published version to show the overview over 2 slides with larger text which hopefully is better to see.	
Is it possible for the .csv downloads to be changed to match the old mipi format? There are now 4 extra lines as shown here: https://i.imgur.com/lr7ouGd.png	Yes, when the temporary banner is removed this will be resolved and we will remove that in the next week.	
Can the data request be used to provide historical data? the portal only goes back to 2017/18 as i recall.	Yes, the Data Request function can be used to request data not available and this would be then be assessed to see if it is possible to be published. In general data is published for past 5 years. The Data Dictionary (link Below) shows the retention for published data items.	
Does published data cover all capacity sold by NG (i.e. including discretionary release) particularly with regard to non-ob NTS Firm Exit capacity at Bacton?	The Capacity Report : Long Term Summary Report has not changed and shows all release by category. (Link to the right) Also the API data item list below provides all our available data items.	[View capacity reports | National Gas Transmission Data Portal](#)
Where can allocated quantities and associated prices of weekly Entry capacity allocations be found in the new portal?	In Find Gas Data if you search for Weekly you will get the capacity folder optionthere is weekly auction data.	
Maybe you will get more questions once we are use to playing with the site	Please direct any further questions to box.operationalliason@nationalgrid.com. Also see below for useful links	

Useful links:

1.Link to the Data Dictionary : Lists all the categories of data we publish: This is a UNC documents published by the Joint Office
https://www.gasgovernance.co.uk/sites/default/files/ggf/page/2020-10/UNC%20Data%20Dictonary%20v14%20Live.xls

2. Link to the API Data Item: list all our available data items:

[API Data Item List v2.3.xlsx (live.com)](#)

3. Link to our Operational data page where we will be adding a library of help documents including information from the Webinar: see under the Gas Data Portal 2023 new section currently just including the welcome pack. (also where the API list above is housed)
