

The Statement of Gas Transmission Connection Charging

2026 Annual Review & Informal Consultation

06 October 2026

Connection Charging Statement - 2026 Annual Review & Informal Consultation

- Standard Condition 4B of National Gas Transmission's Gas Transporter Licence requires us to conduct a review of NTS Connection Charges at least once per year.
- The last review was carried out in early 2025 and the revised Connection Charging Statement published on 17th February 2025.
- The proposed changes to the Statement are explained in this presentation as well as the expected timeline.
- Application fees have been amended based on reconciliation data which show costs are not being covered or alternatively have been increased where the costs have not been reviewed for many years and therefore CPI differences have been applied

Connection Charging Statement - Proposals

PARCA/CAM Incremental Application Fees

- Reduction in PARCA Simple (£53,000 to £40,000)
- Increase in PARCA Top Up (Retained overall cost for 'Red' indicators – Top up £80,000 to meet the £120,000)

Connection Application Fees

- Increase in Standard Design (Fixed Fee) - £13,300 to £18,200
- Increase in Simple Greenfield Connection - £45,000 to £60,000 (Data initiated)

Proposed New Fees

- 'Modification Documentation and Certification Review' of £7,500

Total PARCA Security Amount

- New 'Section 3'

Other updates

- Increase in Feasibility Study Costs
