# Environmental Sustainability Policy

"At National Gas we proudly integrate environmental sustainability into our activities. From addressing climate change to delivering for our local environment and communities, we work to strengthen our business and create long term value for our customers.

Operating at the heart of the Britain's energy system, we deliver today for our customers in a world where we leave nobody behind while preparing to meet the challenges of the future."

Jon Butterworth, Chief Executive

Scope

Our Environmental Sustainability Policy applies to you if you are employed by or carry out work on behalf of National Gas. All our employees shall work in accordance with this policy and our leaders shall ensure this policy is embedded across all levels of the organisation.

We commit to:

- Identify and manage environmental risks and opportunities, including addressing the climate emergency, by developing mitigation plans aligned with our Net Zero glidepath and adaptation measures to ensure the continued resilience of our network to a changing climate.
- Ensure full compliance with all applicable environmental regulations in every location where we operate.
- Protect the environment by preventing pollution and applying mitigation strategies throughout the lifecycle of our assets.
- Assess and implement innovative techniques to lead the transition towards decarbonising our operations.
- Set ambitious environmental commitments in our Environmental Action Plan (EAP) to address our most significant environmental aspects and publish annual progress across five pillars: Climate Change, Circular Economy, Nature, Supply Chain, and Stakeholder Engagement.
- Work with stakeholders and our supply chain to influence and improve environmental stewardship and support the delivery of our commitments.
- Upskill our employees and supply chain partners with the necessary resources to drive behavioural change in environmental sustainability and achieve our targets.
- Regularly review our Environmental Management System to ensure it remains relevant to our operations and provides effective governance for managing and improving environmental performance.
