

Environmental Sustainability Policy

“At National Gas we proudly integrate environmental sustainability into our activities. From addressing climate change to delivering for our local environment and communities, we work to strengthen our business and create long term value for our customers.

Operating at the heart of the Britain’s energy system, we deliver today for our customers in a world where we leave nobody behind while preparing to meet the challenges of the future.”

Jon Butterworth, Chief Executive

We are passionate about our environmental sustainability commitments. We strive to achieve minimal adverse impacts across all our operations whilst also seeking ways to improve the local environment and communities.

Scope

Our Environmental Sustainability Policy applies to you if you are employed by or carry out work on behalf of National Gas. All our employees shall work in accordance with this policy and our leaders shall ensure this policy is embedded across all levels of the organisation.

We commit to:

- Identifying our environmental risks, including climate change, and developing plans to adapt to and/or mitigate them.
- Protecting the environment by ensuring prevention of pollution is a key consideration in the design and operation of all our assets.
- Using resources more efficiently by re-using or refurbishing assets, using sustainable and/or recycled materials.
- Identifying opportunities to embrace new innovations to lead the way in our sector in improving emissions to air and using alternatives to hazardous materials.
- Seeking ways to enhance the natural value of the areas we work for the benefit of local communities and the environment.
- Ensuring all our employees have the training, skills, knowledge, and resources necessary to achieve the requirements of our internal standards.
- Setting expectations of those who work on our behalf to demonstrate the same commitment to the environment as we do and working with our supply chain to contribute to the delivery of our targets.
- Continually improving the Environmental Management System by reviewing and challenging our performance using feedback from stakeholders and benchmarking against our contemporaries.
